For nonaffiliates to market to you	No	We don't share

Questions? Call (888)474-4261, or go to www.citstatebank.com

Who we are

Who is providing this notice? CITIZENS STATE BANK

What we do

How does CITIZENS STATE BANK protect my personal information? To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings.

How does CITIZENS STATE BANK collect my personal information? We collect your personal information, for example, when you

- open an account or deposit money
- pay your bills or apply for a loan
- use your debit card

We also collect your personal information from others, such as credit bureaus, affiliates, or other companies.

Why can't I limit all sharing? Federal law gives you the right to limit only

- sharing for affiliates' everyday business purposes—information about your creditworthiness
- affiliates from using your information to market to you
- sharing for nonaffiliates to market to you

State laws and individual companies may give you additional rights to limit sharing.

Definitions

Affiliates Companies related by common ownership or control. They can be financial and nonfinancial companies.

- Our affiliates include companies that have a common corporate identity with Citizens State Bank. These are financial companies Citizens National Corporation and Republic Corporation and their subsidiary United Republic Bank; Elkhorn Valley Insurance Agency, Inc. and their subsidiary Belden Agency, Inc.; and trade names Citizens Investment Center and Spalding City Agency

Nonaffiliates Companies not related by common ownership or control. They can be financial and nonfinancial companies.

- *CITIZENS STATE BANK does not share with nonaffiliates so they can market to you.*

Joint marketing A formal agreement between nonaffiliated financial companies that together market financial products or services to you. Our Joint Marketing partners include a credit card company.

- We disclose information we receive from you on applications or other forms, such as your name and address, social security number and income

Other Important Information

ONLINE SECURITY STATEMENT

Our website brings together a combination of industry-approved security technologies to protect data for the bank and for you, our customer. It features a VeriSign-issued Digital ID for the bank's Internet Service Provider hosting our website, Secure Sockets Layer (SSL) protocol for data encryption, and a router and firewall to regulate the inflow and outflow of server traffic.

Secure Data Transfer

Once a server session is established on an https secure page, the user and the server are in a secured environment. Because the server has been certified as a 128-bit secure server by VeriSign, data traveling between the user and the server is encrypted with Secure Sockets Layer (SSL) protocol. With SSL, data that travels between the bank and customer is encrypted and can only be decrypted with the public and private key pair. In short, the bank's server issues a public key to the end user's browser and creates a temporary private key. These two keys are the only combination possible for that session. When the session is complete, the keys expire and the whole process starts over when a new end user makes a server session.

Router and Firewall

Secure forms must filter through a router and firewall before they are permitted to reach the server. A router, a piece of hardware, works in conjunction with the firewall, a piece of software, to block and direct traffic coming to the server. The configuration begins by disallowing ALL traffic and then opens holes only when necessary to process acceptable data requests, such as retrieving web pages or sending customer requests to the bank.

Using the above technologies, your Internet loan application and check reorder transactions are secure.
