Triple-Lindy Protocols

Eve Maler, PayPal Identity Services
eve@xmlgrrl.com / @xmlgrrl
#SOUPS10

Degrees of difficulty

- Format vs. UX paradigm vs. protocol

- Codifying current practice vs. disruptive

- Product feature vs. ecosystem

- Vendor push vs. customer pull

- Influence over solution developers

- Normal time vs. Web-years

- Fewer vs. more protocol endpoints

thanks to Trey Ratcliff for photo / by-nc-sa-2.0

The User-Managed Access example

http://tinyurl.com/umawg

- The right design principles?
- The right base technologies?
- Education and persuasion?
- Specs, code, OSS, validators?
- Keystone deployers?
